

ABDULLAH AHMED

TEAM MANAGER | WEBFLOW & UI/UX DEVELOPER

abdullahhahmed1234@gmail.com | Wah Cantt, Pakistan | linkedin.com/in/abdullah-ahmed-96a250144

PROFILE

Team Manager with 5+ years of experience leading front-end design and development teams, managing daily operations, and overseeing technical computing tasks. Currently Team Manager at I Love Design GBR, a Germany-based company, responsible for team performance, daily reporting to leadership, recruitment, and AI-driven workflow automation for German-market web projects, while directly dealing with German-based clients and stakeholders to align priorities and ensure timely delivery. Brings strong international work exposure, combining hands-on Webflow/UI-UX expertise with proven people-management and process-oversight skills.

PROFESSIONAL EXPERIENCE

Team Manager — I Love Design GBR | Germany-based company

2025 – 2026

- Oversee daily operations of the front-end design and development team, including task allocation, progress tracking, and end-of-day reporting to leadership.
- Deal directly with German-based clients and internal stakeholders to support project requirements and ensure timely communication.
- Manage deadline-driven web projects, tracking milestones and coordinating execution through to final delivery.
- Lead large, cross-functional teams across multiple departments, aligning priorities and supporting collaboration.
- Coordinate hiring efforts by attending job fairs and recruitment drives, screening candidates, and managing the onboarding process for new hires.
- Oversee the design and development of German-market websites on Webflow, ensuring UI/UX consistency and adherence to brand standards.
- Monitor quality control by arranging and reviewing website testing, identifying issues, and driving quality improvements before client handoff.
- Drive adoption of AI-powered tools within the team to streamline repetitive design/development tasks and boost overall productivity.
- Support lead-generation and business-development initiatives alongside core team-management responsibilities.

Team Lead — Webflow & UI/UX Designer — Kreativ Ally

2021 – 2025 | Islamabad, Pakistan

- Lead and manage a team of front-end designers and developers, overseeing daily workflow, task delegation, and performance.
- Represent the company at job fairs and recruitment events to source, interview, and onboard new team members.
- Design and build German-market websites and front-end applications on Webflow, with a strong focus on UI/UX.
- Manage and build AI-based tools to automate repetitive design and development workflows, improving team efficiency.
- Conduct quality assurance checks and technical reviews across projects to ensure delivery standards are met.

WordPress Developer — Colorem Digital

August 2020 – 2022 | Islamabad, Pakistan

- Developed business, corporate, and medical websites using WordPress.
- Built and customized e-commerce websites for client storefronts.

Intern — Pakistan Ordnance Factory

2019 (1 Month) | Wah Cantt, Pakistan

- Gained foundational exposure to databases, networking, and inventory management systems.

TECHNICAL COMPUTING & SOFTWARE SUPPORT

- Provide day-to-day software troubleshooting and technical support for the design and development team.
- Set up and maintain software environments, tools, and licenses for new and existing team members.

- Handle technical calculations and data processing tasks to support project planning and delivery.
- Maintain file organization, backups, and access management across ongoing projects.

ACADEMIC PROJECTS

Final Year Project — Traffic Sign Analytics Using Deep Learning — University of Wah

January 2020

- Built a real-time traffic sign detection system using the YOLO object detection algorithm in Python.

Other Academic Projects — University of Wah

2016 – 2020

- Applied machine learning algorithms on randomized datasets using Python.
- Built dynamic websites with WordPress, custom CSS, and Shopify.
- Designed Android applications in Java (Android Studio) and built an Inventory Management System using SQL.

VOLUNTEER EXPERIENCE

- Contributed to a Stanford University project on face recognition using Python.
- Organized and led a workshop on Cloud Computing.

EDUCATION

B.S. in Computer Science — University of Wah

Sept 2016 – July 2020

ACHIEVEMENTS & AWARDS

- 1st Position — Speed Programming and Web Designing Competition, University of Wah.
